

Medicine			
Bachelor	TR-NQF-HE: Level 7	QF-EHEA: Second Cycle	EQF-LLL: Level 7

## Course Introduction and Application Information

Course Code:	UNI349		
Course Name:	Current Research in Cancer		
Semester:	Spring Fall		
Course Credits:	<div>ECTS</div> <div>5</div>		
Language of instruction:	Turkish		
Course Condition:			
Does the Course Require Work Experience?:	No		
Type of course:	University Elective		
Course Level:	<div> <div>Bachelor</div> <div>TR-NQF-HE:7. Master`s Degree</div> <div>QF-EHEA:Second Cycle</div> <div>EQF-LLL:7. Master`s Degree</div> </div>		
Mode of Delivery:	E-Learning		
Course Coordinator:	Doç. Dr. HURİ DEDEAKAYOĞULLARI		
Course Lecturer(s):	Huri Bulut		
Course Assistants:			

## Course Objective and Content

Course Objectives:	To give information about the definition of cancer, its formation and development mechanisms, and the latest developments in cancer research.
Course Content:	Gains analytical and critical thinking skills related to cancer.

## Learning Outcomes

The students who have succeeded in this course;

- 1) Will be able to explain the molecular biology, formation mechanisms and types of cancer.
- 2) Defines the cell cycle and cell checkpoints.
- 3) Explain the protooncogene, oncogene and tumor suppressor genes.
- 4) It can explain antiapoptotic mechanisms and metastasis events in cancer.
- 5) Explain the role of oxidant systems in cancer formation.
- 6) Explain the role of antioxidant defense system in cancer mechanism.
- 7) Explains current treatment methods in cancer.

## Course Flow Plan

Week	Subject	Related Preparation
1)	Cancer Cells and Cancer	Oxford Textbook of Cancer Biology
2)	Mutations in Cancer-1	Oxford Textbook of Cancer Biology
3)	Mutations in Cancer-2	Oxford Textbook of Cancer Biology, 2019
4)	Free radicals and cancer	Oxford Textbook of Cancer Biology, 2019
4)	Free radicals and cancer	Oxford Textbook of Cancer Biology, 2019

## Course - Program Learning Outcome Relationship

Course Learning Outcomes	1	2	3	4	5	6	7
Program Outcomes							
1) When Istinye University Faculty of Medicine student is graduated who knows the historical development of medicine, medical practices, and the medical profession and their importance for society.							
2) knows the normal structure and function of the human body at the level of molecules, cells, tissues, organs and systems.							
3) is capable of systematically taking an accurate and effective social and medical history from their patients and make a comprehensive							

physical examination.							
<b>Course Learning Outcomes</b>	<b>1</b>	<b>2</b>	<b>3</b>	<b>4</b>	<b>5</b>	<b>6</b>	<b>7</b>
4) knows the laboratory procedures related to diseases; In primary care, the necessary material (blood, urine, etc.) can be obtained from the patient with appropriate methods and can perform the necessary laboratory procedures for diagnosis and follow-up or request laboratory tests.							
5) can distinguish pathological changes in structure and functions during diseases from physiological changes and can Interpret the patient's history, physical examination, laboratory and imaging findings, and arrive at a pre-diagnosis and diagnosis of the patient's problem.							
6) knows, plans and applies primary care and emergency medical treatment practices, rehabilitation stages.							
7) can keep patient records accurately and efficiently, know the importance of confidentiality of patient information and records, and protects this privacy.							
8) knows the clinical decision-making process, evidence-based medicine practices and current approaches.							
9) knows and applies the basic principles of preventive health measures and the protection of individuals from diseases and improving health, and recognizes the individual and/or society at risk, undertakes the responsibility of the physician in public health problems such as epidemics and pandemics.							
10) knows the biopsychosocial approach, evaluates the causes of diseases by considering the individual and his / her environment.							
11) is capable of having effective oral and/or written communication with patients and their relatives, society and colleagues.							
12) knows the techniques, methods and rules of researching. It contributes to the creation, sharing, implementation and development of new professional knowledge and practices by using science and scientific method within the framework of ethical rules.							
13) can collect health data, analyze them, present them in summary, and prepare forensic reports.							
14) knows the place of physicians as an educator, administrator and researcher in delivery of health care. It takes responsibility for the professional and personal development of own and colleagues in all interdisciplinary teams established to increase the health level of the							

society.							
<b>Course Learning Outcomes</b>	<b>1</b>	<b>2</b>	<b>3</b>	<b>4</b>	<b>5</b>	<b>6</b>	<b>7</b>
15) knows employee health, environment and occupational safety issues and takes responsibility when necessary.							
16) knows health policies and is able to evaluate their effects in the field of application.							
17) keeps medical knowledge up-to-date within the framework of lifelong learning responsibility.							
18) applies own profession by knowing about ethical obligations and legal responsibilities, prioritizing human values and with self-sacrifice throughout own medical life.							

### Course - Learning Outcome Relationship
