Bachelor	TR-NQF-HE: Level 6	QF-EHEA: First Cycle	EQF-LLL: Level 6

Course Introduction and Application Information

Course Code:	UNI095					
Course Name:	Career Development Planning and Management					
Semester:	Spring	Spring				
Course Credits:	ECTS					
	5					
Language of instruction:	Turkish					
Course Condition:						
Does the Course Require Work Experience?:	No					
Type of course:	University Elective					
Course Level:	BachelorTR-NQF-HE:6.QF-EQF-LLL:6.Master`s DegreeEHEA:FirstMaster`s DegreeCycleCycle					
Mode of Delivery:	E-Learning					
Course Coordinator:	Dr. Öğr. Üy. HİLAL ÇAKAR ÖZCAN					
Course Lecturer(s):	HİLAL ÇAKAR					
Course Assistants:						

Course Objective and Content

Course	Introducing career methods to help students adapt to the rapidly changing economic, social,			
Objectives:	ves: cultural, ethical and legal conditions of the business world and to gain the ability to adapt them			
	their own lives. As the highly motivated employees who can predict the future, know what is			
	waiting for them, determine their goals, and aim to ensure that they have the necessary			
	knowledge and equipment to devote themselves to their jobs.			

Course	Career concept, career planning and stages, Individual career development, developing a			
Content:	personal career strategy, Career planning model, career options related to teaching fields;			
	Preparing a curriculum vitae (CV) and types of résumé, CV format and examples, Important			
	points to keep in minds while preparing a CV, Make cover letters for resumes introducing			
	theirselves, promotional letters, methods and types of job interview preparation to job interview,			
	and stages, Situations that may be encountered in interviews; Question types, body language			
	signs.			

Learning Outcomes

- The students who have succeeded in this course;
- 1) 1. Be able to explain the principles underlying career planning
- 2) 2. Improve their personal profile by ascertaining their interests.
- 3) 3. Develop career goals that are achievable to get the most appropriate jobs for them.
- 4) 4. Discover appropriate career options, job types, and position requirements in the selected sectors.
- 5) 5. Improve interaction/ communication skills
- 6) 6. Prepare documents such as job application, letter of intent, resume etc

Course Flow Plan

Week	Subject	Related Preparation
1)	What is career management?	-
2)	Career Planning and Development	-
3)	Career Planning and Development	-
3)	Career Planning and Development	-
4)	Career stages: to know your personal preferences	-
5)	Career tendencies in the world	-
6)	What the business orld expects from unexperienced graduates?	-
7)	How to create a good resume, a cover letter and a thank you letter	-
8)	Midterm Exam	-
9)	How to make an impressive job interview. Interview techniques, research business techniques	-
10)	Basic concepts of performance management	-
11)	Time management	-

12)	Professional etics: What is wrongdoing?	-
13)	Professional etics: What is wrongdoing? How to avoid whistleblowing?	-
14)	General review	-
15)	Final Exam	-

Course - Program Learning Outcome Relationship

Course Learning Outcomes	1	2	3	4	5	6
Program Outcomes						
1) Adequate knowledge in mathematics, science, and computer engineering principles, both theoretical and practical, and the ability to apply this knowledge to complex engineering problems						
2) To act in accordance with ethical principles, professional and ethical responsibility; information on the standards used in engineering applications.						
3) Information on business practices such as project management, risk management and change management; awareness of entrepreneurship and innovation; information about sustainable development.						
4) Knowledge of the effects of computer engineering practices on health, environment and safety in the universal and social scale and the problems of the era reflected in computer engineering; awareness of the legal consequences of computer engineering solutions.						
5) Ability to identify, formulate, and solve complex computer engineering problems using appropriate analysis and modeling techniques.						

6) Ability to design and develop complex computer systems, devices, or Course Learning Outcomes products that meet specific requirements and operate under realistic constraints and conditions, using modern design methods.	1	2	3	4	5	6
7) Ability to communicate effectively orally and in writing; knowledge of at least one foreign language; ability to write effective reports and understand written reports, to prepare design and production reports, to make effective presentations, to give and receive clear and understandable instructions.						
8) Awareness of the necessity of lifelong learning; ability to access information, to follow developments in science and technology and to renew continuously.						
9) Ability to develop, select and use modern techniques and tools used for the analysis and solution of complex computer engineering problems, and the ability to use information technologies effectively.						
10) Ability to plan and conduct experiments, collect and analyze data, and interpret results in the study of complex computer engineering problems or research topics.						
11) Ability to work effectively within and multidisciplinary teams; individual study skills.
