

Dentistry			
Bachelor	TR-NQF-HE: Level 6	QF-EHEA: First Cycle	EQF-LLL: Level 6

Course Introduction and Application Information

Course Code:	UNI198		
Course Name:	Article Reading and Review		
Semester:	Fall Spring		
Course Credits:	<div>ECTS</div> <div>5</div>		
Language of instruction:	Turkish		
Course Condition:			
Does the Course Require Work Experience?:	No		
Type of course:	University Elective		
Course Level:	<div> <div>Bachelor</div> <div>TR-NQF-HE:6. Master`s Degree</div> <div>QF-EHEA:First Cycle</div> <div>EQF-LLL:6. Master`s Degree</div> </div>		
Mode of Delivery:	E-Learning		
Course Coordinator:	Dr. Öğr. Üy. GÜLSÜM GÖKGÖZ		
Course Lecturer(s):	Atiye Türker		
Course Assistants:			

Course Objective and Content

Course Objectives:	This course is an introduction to the article evaluation process. Topics to improve reading and evaluation skills of scientific articles are covered.
Course Content:	Scientific publication resources (Journals and search engines) Literature search, article types and features, article reading and evaluation

Learning Outcomes

The students who have succeeded in this course;

- 1) Can explain the periodicals in which scientific articles are published and their features
- 2) Can explain article types and features
- 3) Can perform a literature search using national journals and search engines
- 4) Can explain the structure and features of a scientific article
- 5) Can evaluate the research article

Course Flow Plan

Week	Subject	Related Preparation
1)	Scientific publication resources (Journals and search engines)	
2)	Article scanning using national journals	
3)	Article search using national engines	
4)	Scientific article types and features	
5)	Parts of a scientific article	
6)	Research article reading and evaluation	
7)	Midterm exam	
8)	Research article reading and evaluation	
9)	Review article reading and evaluation	
10)	Review article reading and evaluation	
11)	Case report article reading and evaluation	
12)	Systematic review Article reading and evaluation	
13)	Meta analysis article reading and evaluation	
14)	Course evaluation	
15)	FINAL EXAM PERIOD

Course - Program Learning Outcome Relationship

Course Learning Outcomes	1	2	3	4	5
Program Outcomes					
1) Has basic and up-to-date knowledge in the field of dentistry, follows scientific publications, and applies evidence-based data to his/her professional practice.					
2) Knows well and effectively uses devices, tools, and materials specific to diagnosis and treatment in the field of dentistry.					
3) Evaluates the knowledge in the field of dentistry critically, integrates it with the knowledge of disciplines in the field of health, uses it by analyzing and synthesizing it.					
4) Produces projects related to the field of dentistry, can work with other health disciplines, takes part as a member of the research team and evaluates and reports the results obtained at a scientific level.					
5) Uses information that will contribute to the dentistry profession during practice, takes responsibility, and produces solutions in unforeseen situations.					
6) Shares, compares, and exchanges dental knowledge with professional colleagues in social and scientific environments in written, verbal, and visual forms.					
7) Within the framework of social, scientific, and ethical values including patient privacy, communicates with patients and their relatives, knows all the characteristics of the patient, and recommends the most appropriate treatment with a patient-centered approach.					
8) Follows technological developments, participates in national and international studies, and shares and presents own observations, experiences, and research to further advance dental practices.					
9) By adopting the principle of lifelong learning throughout the dentistry profession, follows current evidence-based dental knowledge and uses it during his professional practice.					
10) During dental practice, in cases such as abuse and addiction, performs the treatment by exhibiting the behaviors required by social ethics and legal rules, and collects and records the relevant data.					
11) Uses basic and current knowledge in the field of dentistry during professional practice for the benefit of society within the framework of national values and country realities.					

Course Learning Outcomes	1	2	3	4	5
12) In natural disasters and emergency cases, takes the protective measures required by the dentistry profession; performs professional practices that benefit patients and society					
13) Generates ideas regarding health policy in dentistry, prioritizes individual and public health, and carries out preventive and therapeutic medical practices within the framework of scientific, ethical, and quality processes.					
14) Differentiates the signs and symptoms commonly encountered in the dentistry profession, makes a treatment plan and refers when necessary, and manages diseases and clinical situations regarding their urgency and patient priority.					
15) Can assume the leadership responsibility of the team he/she works for, manage it following scientific criteria, and support the professional development of the team.
