Medicine			
Bachelor	TR-NQF-HE: Level 7	QF-EHEA: Second Cycle	EQF-LLL: Level 7

# **Course Introduction and Application Information**

Course Code:	UNI229				
Course Name:	Rational Dr	ug Use in Clinical Practio	ce		
Semester:	Spring Fall				
Course Credits:	ECTS 5				
Language of instruction:	Turkish				
Course Condition:					
Does the Course Require Work Experience?:	No				
Type of course:	University E	Elective			
Course Level:	Bachelor	TR-NQF-HE:7. Master`s Degree	QF- EHEA:Second Cycle	EQF-LLL:7. Master`s Degree	
Mode of Delivery:	E-Learning				
Course Coordinator:	Öğr. Gör. ŞERİFE YEKBUN TÜTÜNCÜ				
Course Lecturer(s):	Ş. Yekbun Tütüncü				
Course Assistants:					

# **Course Objective and Content**

Course Objectives:	This course aims to provide information about rational drug use and practices, inform healthcare personnel about drug problems they may encounter, and provide public education about drugs.
Course Content:	Definition of rational drug use, consequences of misuse of drugs, rational drug practices, case studies, updating information in terms of rational drug use in special patient groups (children and

the elderly, psychiatric patients) and evaluating clinically important drug interactions, evaluating the information on rational drug use and patient education.

#### **Learning Outcomes**

The students who have succeeded in this course;

- 1) Learns the rational drug definition.
- 2) Learns rational drug applications.
- 3) Learns the concepts of rational drug administration in various patient groups.
- 4) Understands the selection of drugs suitable for the clinical condition of the patient in the treatment of diseases.
- 5) Learns individualization of the dose. May refer the patient to the physician so that rational treatment can be provided in collaboration with the physician regarding different treatment approaches to different populations.
- 6) Learns irrational treatment approaches in different groups

#### **Course Flow Plan**

Week	Subject	Related Preparation
1)	Introduction to the Course, Course Objectives and Learning Objectives	
2)	Rational Drug Use: Introduction and General Definitions	
3)	Rational Antibiotic Use	
4)	Rational Drug use in Elderly	
5)	Rational Drug use in Elderly II	
6)	Rational Drug Use in pediatric patients	
7)	Midterm Exam	
8)	Rational Drug Use in Pregnant women	
9)	Rational Drug Use in Pregnant Women II	
10)	Rational Drug Use in Psychiatry	
11)	Rational Drug Use in Anxiety	
12)	Patient Education and an Example for Presentation	
13)	Student Presentations	
14)	Student Presentations	
15)	Final Exam

# **Course - Program Learning Outcome Relationship**

Course Learning Outcomes	1	2	3	4	5	6
Program Outcomes						
1) The graduate integrates the knowledge, skills, attitudes, and behaviours acquired from basic and clinical sciences, behavioural sciences, and social sciences in the form of competencies and uses them for the provision of rational, effective, safe health care services in accordance with quality standards in the prevention, diagnosis, treatment, follow-up, and rehabilitation processes, and during the process considers protection of both patient's health and healthcare workers health including her/his own.						
2) The graduate shows a biopsychosocial approach in patient management that considers the sociodemographic and sociocultural background of the individual without discrimination of language, religion, race, and gender.						
3) The graduate prioritizes the protection and development of the health of individuals and society in the provision of health care services.						
4) The graduate, considering the individual, social, public, and environmental factors affecting health; works towards maintaining and improving the state of health.						
5) In the provision of health care services, the graduate considers both the changes in the physical and socioeconomic environment on a regional and global scale that affect health, as well as the changes in the individual characteristics and behaviours of the people who apply to her/him.						
6) The graduate recognizes the characteristics, needs and expectations of the target population and provides health education to healthy/sick individuals and their relatives and other health care workers.						
7) While carrying out her/his profession, the graduate fulfils her/his duties and obligations with determined behaviours to provide high-quality health care within the framework of ethical principles, rights and legal responsibilities and						

good medical practices, considering the integrity, privacy, and dignity of the Course Learning Outcomes	1	2	3	4	5	6
8) The graduate evaluates and improves her/his own performance in professional practices in terms of emotions, cognitive characteristics, and behaviours.						
9) The graduate physician advocates improving the provision of health services by considering the concepts of social reliability and social commitment to protect and improve public health.						
10) To protect and improve health, the graduate physician can plan and carry out service delivery, training and consultancy processes related to individual and community health in cooperation with all components.						
11) The graduate physician evaluates the impact of health policies and practices on individual and community health indicators and advocates increasing the quality of health services.						
12) The graduate physician attaches importance to protecting and improving her/his own physical, mental, and social health, and does what is necessary for this.						
13) During the provision of health care, the graduate shows exemplary behaviours and leads within the health team.						
14) The graduate uses the resources cost-effectively, in the planning, implementation, execution, and evaluation processes of the health care services in the health institution she/he manages, for the benefit of the society and in accordance with the legislation.						
15) The graduate communicates positively within the health team with whom she/he provides health care services, being aware of the duties and obligations of other health workers and shows appropriate behaviours to assume different team roles when necessary.						
16) The graduate works harmoniously and effectively with her/his colleagues and other professional groups in her/his professional practice.						
17) The graduate communicates effectively with patients, patient relatives, health care workers and other professional groups, institutions, and organizations, including individuals and groups that require a special approach and have different sociocultural characteristics.						
18) The graduate shows a patient-centred approach in the protection, diagnosis, treatment, follow-up, and rehabilitation processes that involve the patient and patient's caregivers as partners in the decision-making						

mechanisms.  Course Learning Outcomes	1	2	3	4	5	6
19) When necessary, the graduate plans and implements scientific research for the population she/he serves, and uses the results ontained and/or the results of other research for the benefit of the society.						
20) The graduate reaches the current literature information related to her/his profession, evaluates critically, and applies the principles of evidence-based medicine in the clinical decision-making process.						
21) The graduate uses information technologies to improve the effectiveness of her/his work in health care, research, and education.						
22) The graduate effectively manages individual study and learning processes and career development.						
23) The graduate demonstrates the ability to acquire, evaluate, integrate new knowledge with existing knowledge, apply it to professional situations, and adapt to changing conditions throughout professional life.						
24) The graduate chooses the right learning resources to improve the quality of the health care service she/he provides, organizes her/his own learning process.
