

Medicine			
Bachelor	TR-NQF-HE: Level 7	QF-EHEA: Second Cycle	EQF-LLL: Level 7

Course Introduction and Application Information

Course Code:	UNI260		
Course Name:	Experimental Ex-libris Design		
Semester:	Spring Fall		
Course Credits:	<div>ECTS</div> <div>5</div>		
Language of instruction:	Turkish		
Course Condition:			
Does the Course Require Work Experience?:	No		
Type of course:	University Elective		
Course Level:	<div> <div>Bachelor</div> <div>TR-NQF-HE:7. Master`s Degree</div> <div>QF-EHEA:Second Cycle</div> <div>EQF-LLL:7. Master`s Degree</div> </div>		
Mode of Delivery:	E-Learning		
Course Coordinator:	Prof. Dr. HASİP PEKTAŞ		
Course Lecturer(s):	Prof. Dr. Hasip Pektaş		
Course Assistants:			

Course Objective and Content

Course Objectives:	To comprehend the ex-libris culture, To teach the functions of exlibris, To encourage creativity, To gain self-confidence by designing an artistic product,

Course Content:	In this course, students will learn the brief history, function and characteristics of the ex-libris stucked on the inside cover of the books and bearing the name of its owner. They will design original ex-libris for people who live as a communication object. They will create experimental examples by bringing together artistic thought.
-----------------	---

Learning Outcomes

The students who have succeeded in this course;

- 1) Knows what exlibris is.
- 2) He/she can explain ex-libris to his/her close friends.
- 3) Can analyze the ex-libris samples.
- 4) Knows the principles of composition in exlibris design.

Course Flow Plan

Week	Subject	Related Preparation
1)	Definition and brief history of ex-libris. Ex-libris samples.	
2)	Functions and properties of ex-libris.	
3)	Preparing ex-libris drafts for individuals or institutions.	
4)	Designing ex-libris using photography.	
5)	Basics of using Illustrator and Photoshop.	
6)	Criticisms on drafts.	
7)	Ex-libris reproduction, subtitle. DELIVERY OF HOMEWORKS.	
8)	Analysis on ex-libris artists and designs from the world and Turkey.	
9)	Ex-libris propagation techniques and properties.	
10)	Drafting for ex-libris to be reproduced with linoleum printing technique.	
11)	How do we apply the linoleum technique in Photoshop?	
12)	Linoleum printing at home as much as possible.	
13)	Suggestions for ex-libris collecting. TERM PROJECT DELIVERY.	
14)	Presentation of ex-libris and preparation for exhibition.

Course - Program Learning Outcome Relationship

Course Learning Outcomes	1	2	3	4
Program Outcomes				
1) The graduate integrates the knowledge, skills, attitudes, and behaviours acquired from basic and clinical sciences, behavioural sciences, and social sciences in the form of competencies and uses them for the provision of rational, effective, safe health care services in accordance with quality standards in the prevention, diagnosis, treatment, follow-up, and rehabilitation processes, and during the process considers protection of both patient's health and healthcare workers health including her/his own.				
2) The graduate shows a biopsychosocial approach in patient management that considers the sociodemographic and sociocultural background of the individual without discrimination of language, religion, race, and gender.				
3) The graduate prioritizes the protection and development of the health of individuals and society in the provision of health care services.				
4) The graduate, considering the individual, social, public, and environmental factors affecting health; works towards maintaining and improving the state of health.				
5) In the provision of health care services, the graduate considers both the changes in the physical and socioeconomic environment on a regional and global scale that affect health, as well as the changes in the individual characteristics and behaviours of the people who apply to her/him.				
6) The graduate recognizes the characteristics, needs and expectations of the target population and provides health education to healthy/sick individuals and their relatives and other health care workers.				
7) While carrying out her/his profession, the graduate fulfils her/his duties and obligations with determined behaviours to provide high-quality health care within the framework of ethical principles, rights and legal responsibilities and good medical practices, considering the integrity, privacy, and dignity of the patient.				
8) The graduate evaluates and improves her/his own performance in professional practices in terms of emotions, cognitive characteristics, and behaviours.				
9) The graduate physician advocates improving the provision of health services by considering the concepts of social reliability and social commitment to protect and				

improve public health.				
Course Learning Outcomes	1	2	3	4
10) To protect and improve health, the graduate physician can plan and carry out service delivery, training and consultancy processes related to individual and community health in cooperation with all components.				
11) The graduate physician evaluates the impact of health policies and practices on individual and community health indicators and advocates increasing the quality of health services.				
12) The graduate physician attaches importance to protecting and improving her/his own physical, mental, and social health, and does what is necessary for this.				
13) During the provision of health care, the graduate shows exemplary behaviours and leads within the health team.				
14) The graduate uses the resources cost-effectively, in the planning, implementation, execution, and evaluation processes of the health care services in the health institution she/he manages, for the benefit of the society and in accordance with the legislation.				
15) The graduate communicates positively within the health team with whom she/he provides health care services, being aware of the duties and obligations of other health workers and shows appropriate behaviours to assume different team roles when necessary.				
16) The graduate works harmoniously and effectively with her/his colleagues and other professional groups in her/his professional practice.				
17) The graduate communicates effectively with patients, patient relatives, health care workers and other professional groups, institutions, and organizations, including individuals and groups that require a special approach and have different sociocultural characteristics.				
18) The graduate shows a patient-centred approach in the protection, diagnosis, treatment, follow-up, and rehabilitation processes that involve the patient and patient's caregivers as partners in the decision-making mechanisms.				
19) When necessary, the graduate plans and implements scientific research for the population she/he serves, and uses the results obtained and/or the results of other research for the benefit of the society.				
20) The graduate reaches the current literature information related to her/his profession, evaluates critically, and applies the principles of evidence-based medicine in the clinical decision-making process.				
21) The graduate uses information technologies to improve the effectiveness of her/his work in health care, research, and education.				

22) The graduate effectively manages individual study and learning processes and career development. Course Learning Outcomes	1	2	3	4
23) The graduate demonstrates the ability to acquire, evaluate, integrate new knowledge with existing knowledge, apply it to professional situations, and adapt to changing conditions throughout professional life.				
24) The graduate chooses the right learning resources to improve the quality of the health care service she/he provides, organizes her/his own learning process.
