

Internationalization

The main condition for modernization in any institution is to establish international partnerships.

In this context, we are moving forward in our education, research, and development activities with the aim of being an institution that affects the society in the national and international arena.

Within the framework of our internationalization policy, we give priority to these issues below;

1. Increasing the number of international students and country diversity,
1. Increasing student and staff mobility within the scope of Exchange and Joint Education Programs,

III. Increasing the number of cooperation agreements signed with leading international institutions/organizations in their fields all around the world,

1. Following the international accreditation application procedures within the scope of our diploma recognition studies.

We believe that; thanks to the care and attention we show to internationalization, Istinye University will take firm steps forward to take its place among the world's leading universities.
