

Internships

Internship activities of students at İstinye University are organized within the career office. For students who need to be in the public or private sector for internship and practice, the administrative operation of the inter-institutional protocol and communication processes are carried out by the career office, and the office also acts as a bridge between academic units and other administrative units. The students can get mentorship from our unit related to the processes of all compulsory and voluntary internships. At the same time, our career office carries out the necessary coordination for the insurance procedures of our students.
