

Electrical and Electronic Engineering (English)

Bachelor

TR-NQF-HE: Level 6

QF-EHEA: First Cycle

EQF-LLL: Level 6

Program Information

The Bachelor's Program in Electrical and Electronics Engineering begins with fundamental courses such as mathematics, physics, and electronic circuit design, and then delves deeply into areas such as digital signal processing, control systems, electrical machines, power systems, communication systems, and microelectronic design. Students are taught various programming and simulation languages, including C, MATLAB, and Python. In the last two years of their education, students can specialize in various elective courses according to their interests within Electrical and Electronics Engineering.
