

Opticianry			
Associate	TR-NQF-HE: Level 5	QF-EHEA: Short Cycle	EQF-LLL: Level 5

Program Information

Students who receive education in the Opticians Program graduate with high technology devices and laboratories, which should be in the optical institution environment used in both theoretical and practical courses, with high knowledge and equipment. Our students who have graduated from the Health Services Vocational School Optician program, which has a strong academic staff, have general public health knowledge, are entrepreneurial and self-renewing, have adopted the philosophy of total quality and can support the relevant institutional processes, and are able to deal with environmental, social and ethical problems related to their profession and related to them. We aim to train technical staff who know their responsibilities and observe the health and safety measures related to their profession.
