

Health Management (Master) (without Thesis)			
Master	TR-NQF-HE: Level 7	QF-EHEA: Second Cycle	EQF-LLL: Level 7

Program Information

In our country, the rapid increase in the number of public and especially private health institutions, the development and change of medical technology day by day, the increasing importance of health tourism, the developments and growth in the pharmaceutical sector and the medical sector increase the need for qualified health managers.

Our Health Management Master's Program has a voice in the field, with faculty members, many of whom come from health services; It strives to train health managers who will respond to the needs of institutions and organizations providing health services in our country, who know modern management, have ethical values, respect patient and employee rights, use resources effectively, and speak foreign languages.
