

Interior Architecture (Master) (with Thesis)			
Master	TR-NQF-HE: Level 7	QF-EHEA: Second Cycle	EQF-LLL: Level 7

Program Information

The Master's Program in Interior Architecture provides students with an academic framework by imparting theoretical foundations of interior design, fostering creative design abilities, honing technical skills, cultivating project management competencies, and emphasizing sustainability principles. This program equips students with the ability to comprehend the aesthetic and functional requisites of interior spaces, preparing them for professional success across a variety of projects. Furthermore, it offers the opportunity to enhance communication and collaboration skills, thereby expanding career opportunities for graduates in the field of interior architecture.
